

1) Sealing Machines - Hand Operated Sealer

This machine is our prime model in the manually operated sealers. These machines are especially used to seal the openings of ready-made bags. There are impulse sealing bars which gets heated during sealing procedure only. The sealing time is adjustable with a timer. It has audio-visual sealing indicators. It is best suitable for small quantities of packaging with very low power consumption. It also has a round element option for sealing and cutting simultaneously.

Technical Specifications

Sr. no	Model	Sealing Size (in mm)		Power		Dimensions (in mm)			Weight
		L	W	Volt	Watt	L	W	H	Kg
1	PP 200H	200 (8")	1.5	240	250	320	85	250	3.5
2	PP300H	300 (12")	1.5	240	350	420	85	250	5.5
3	PP 400H	400 (16")	1.5	240	450	520	85	250	6.5

2) Sealing Machines - Foot Operated Sealer

This user friendly machine helps the operator to adjust the heavier bags as the operation is done with the help of the foot. It has tilt able sealing jaws and an adjustable bag rest is provided for operator's comfort. It also has an adjustable electronic timer and audio-visual sealing indicators.

Additional features of HOT BAR SEALERS and CODE BAR SEALERS especially for the multi layer laminated bags can also be provided as per your requirement. Almost all the multi layer laminated bags of aluminum/ paper/ polyethylene/ polyurethane lamination can be sealed with the HOT BAR SEALERS.
